

IBM WATON IoT PLATFORM:

The screenshot shows the IBM Cloud Dashboard. The top navigation bar includes the IBM logo, a search bar, and links to Catalog, Manage, and a user profile. The main content area is titled "Dashboard" and features a "For you" section with several tiles: "Build" (Explore IBM Cloud with this selection of easy starter tutorials and services), "Explore IBM Cloud Shell" (Try a command-driven approach for creating, developing, and deploying a web project), "Visit the IBM Cloud catalog" (Explore our unique product catalog that contains 190+ services and software for your business solutions), "Set up your IBM Cloud account" (Learn how to set up your IBM Cloud account, manage your account settings, organize resources, and control access to those resources), "Build a web app with Watson Speech to Text" (Deploy a conversational interface compatible with any application, device, or channel), and "Get Started with Watson Studio" (Get started with using AI and Cloud Object Storage in 15 minutes). Below this, there are sections for "News", "Recent support cases", "Planned maintenance", and "IBM Cloud status". The bottom of the dashboard shows a world map and a "Create resource" button.

The screenshot shows the IBM Cloud Catalog for the Internet of Things Platform. The page is titled "Internet of Things Platform" and includes a description: "This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data." The "Create" tab is active, showing a "Select a location" dropdown menu with "London (eu-gb)" selected. Below this, there is a "Select a pricing plan" section with a table of plans. The "Lite" plan is selected, showing features like "Includes up to 500 registered devices, and a maximum of 200 MB of each data metric" and a pricing of "Free". A "Summary" sidebar on the right provides details about the plan, including location, plan name, and service name. A warning message states: "Existing Lite plan instance. You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance." The bottom of the page shows a "Create" button and an "Add to estimate" button.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

IBM Watson IoT Platform Journey

Lite

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

Free Starts at \$500 per month Includes IBM Service & Support
